and the  
Austrian Society for Neurosurgery

## WELCOME WORDS

Dear friends and colleagues,

from March 29 – April 1, 2012, **TWO** World Class Meetings will be held in **ONE** Event in Vienna, Austria:  
The **5th World Congress for ENDOSCOPIC SURGERY of the BRAIN, SKULL BASE & SPINE**  
combined with  
The **First Global Update on FESS, THE SINUSES & THE NOSE**

The **5th World Congress for ENDOSCOPIC SURGERY of the BRAIN, SKULL BASE & SPINE** in Vienna will deal with the fascinating and sometimes breathtaking latest developments of endoscopic possibilities along and through skull base, inside the brain and spine. New achievements have been made in all sectors, Trans Orbital NeuroEndoscopic Surgery (TONES) being just one of them. Image guided Navigation has come of age, providing unseen-before-accuracy; 3D endoscopy, magnificent HD endoscopic cameras and sophisticated instrumentation will be on display **and used during numerous live on-stage demonstration dissections, performed by the masters and pioneers of the speciality.**

The **First Global Update on FESS, THE SINUSES & THE NOSE**

It was over 25 years ago that the first publications and consequently, courses on FESS appeared – the beginning of an unparalleled success story. From its humble beginnings in the 1970s to the sophisticated potential of today's extended applications, the **First Global Update** will bring together the pioneers and today's most renowned endoscopists, to evaluate the achievements of the last 25 years: where we have failed, where we should change or modify our techniques. Where can we avoid surgery? Experts will try to give the answers! Any new surgical tricks, new sophisticated instruments, endoscopes, cameras, navigational tools? What is the current status of balloon-based technology? Come and see it in Vienna!

There will be over **20 surgical live demonstrations by experts on the best anatomical specimens available**, provided and prepared by **Professor M. Tschabitscher** from the Vienna Anatomy Department. **Live video sessions** of unedited surgical procedures with original soundtracks will give you that authentic "theatre feeling" including the "oops" and true troubles, as if happening the very moment you watch.

**Registration fees** especially for "early birds" and those 35 years and younger will be **affordably low** to allow participation for young doctors in training, who frequently cannot afford more expensive meetings on such a high educational level – they are encouraged to turn in their abstracts for oral or video presentations and posters.

It is our privilege to invite you to this outstanding event, which will attract the majority of the world's leading authorities in the respective fields. We aim to provide a unique global update and "going stronger" than ever since its introduction more than 25 years ago...

So come, join us and share **your** experience with the global "endoscopic community"!

On behalf of the Austrian Societies of ORL, H&NS and Neurosurgery:

Heinz Stammberger

Hannes Braun

Michael Mokry

Verena Gellner

## VIENNA

This city always finds ways to **surprise** and **delight** you. Just take in its unique atmosphere, which is rich in history and tradition, yet also fresh and upbeat.

The **city centre** is a small universe in itself: discover historical palaces face to face with modern facades, and elegant boutiques next to trendy fashion stores.

When it comes to **food**, you should definitely try famous Austrian dishes such as 'Wiener Schnitzel' (breaded escalope of veal) and treat yourself to coffee and a slice of cake at one of Vienna's many cafés.

**Music** lovers may jump at a chance to see 'L'elisir d'amore' or 'Tosca' at the Staatsoper, while others may prefer more modern fare offered during the annual 'Wiener Festwochen' festival.

Get a feel of Vienna's **art** scene during a city walking tour, or while visiting one of Vienna's many museums.

Must-sees will include Gustav Klimt shows both at Albertina and Belvedere Palace.

**Sights** not to be missed are St. Stephen's Cathedral right in the heart of the city, Schloss Schönbrunn, and the Giant Ferris Wheel at the 'Prater' fairground.

When planning **your trip**, just remember that...

- travel to, from and within Vienna is quick and easy.
- in general, people speak English, and many also other foreign languages – so you'll be sure to find your way around.
- the temperatures in March might still be low. So don't forget to bring your jacket!
